Ms. Mariem Aissa, born on 01.06.2000, was employed as an intern in the research and development department of our company, dytab GmbH, from 27.05.2024 to 27.11.2024.

The **dytab** GmbH offers a SaaS tool for regulatory affairs professionals, **meddevo** eTD, which facilitates the creation, automation and monitoring of technical documentation as well as the management of submissions. It combines and synchronizes content and document management, ensures compliance and tracks product-related changes. The tool includes features such as content checks and automatic folder structures to support the process.

As part of her role, Ms. Aissa took on the following tasks in particular:

- Development of an AI tool to support our customers in creating documents required for regulatory purposes using OpenAI
- Prompt engineering to optimize the AI results for the customers
- Implementation of retrieval augmented generation with OpenAI
- Integration of additional data entries into the AI system for better responses
- Integration of Server-Sent Events for real-time communication and streaming AI-generated responses to users.
- Implementation of assistants with OpenAI
- Sharing her knowledge of AI systems with employees

Ms. Aissa was always an extremely motivated employee (intern). She approached difficult tasks with great enthusiasm and always found sensible and practicable solutions.

She was extremely reliable and her working style was always characterized by very careful planning and a systematic approach. Even when the workload was very high, Ms. Aissa proved to be a resilient employee and went above and beyond the call of duty.

Michael Kania, CEO
